

# Cemetery Mapping Using GIS

*Ipswich, Massachusetts  
(2009-2010)*

Completed plan review of all Town-owned cemetery archives and scanned relevant records. Created GIS map identifying the locations of cemeteries and digitized plots by superimposing scanned images of paper cemetery plans over orthography displayed in the GIS map. Developed geodatabase to link attribute data including plot ownership status, owner name and address, and scans of historic plans to the cemetery plot feature allowing the Town to have convenient and paperless access to cemetery plot and owner information.
